Jun Young Kim	518370990010
Boqun Li	518021910045

### Criteria

1. Number of affected people
2. The number of doctors in one country
3. The ability to detect those are affected
4. Number of masks/ life support machines

Diagram:

### Needs

1. Cure affected people and separate them from healthy people
2. Provide protections to healthy people.
3. Improve the doctors' ability to saving people

### Problems

1. Fatality rate and rate of infection of Covid-19
2. ( Uneven distribution of doctors in different province)  
(Shortage of doctors)
3. Patients those are not detected can spread the disease.
4. Shortage of masks and medical supplies

### Solutions

1. Import medical supplies from foreign countries
2. Use online hospital platform to diagnose.
3. Redistribute doctors to the most needed area
4. Increase the financial support to researchers.
